

Teaching Them For Him

Guidance for Parents Managing Their Children's Homework

General guidelines for all parents and those helping with student homework:

1. Supervise, explain, assist, and direct the student while they're working. Please don't do the work for them.
2. Keep expectations up to classroom standards. Examples: good handwriting, complete sentences, math work shown, neatly organized, etc. Neatness counts!
3. Work should reflect the student's efforts, ability, and understanding.
4. Grade the work and direct students to correct mistakes.
5. Communicate with your teachers as needed with questions.

Specifics for Grades 5-8

1. Monitor your student's tech use. Make sure they are using the tech as it is intended.
2. Make sure you have good safety and security protocols in place (both software and hardware are recommended), but nothing beats having adults monitoring children while online!
3. Tests will be posted as scheduled by teachers, and directions for tests will be explained. Parents should monitor their students while taking tests.
4. Help grade math daily. This ensures that students are learning math correctly and teachers can catch mistakes and reteach as needed.
